Just Who Do You Think I am?!

1. I'm red, green, yellow and blue.
You'll never catch me, whatever you do.
2. I lose my head every morning, and get it back at night.
I can help you relax, or lead you to a fright.
3. You saw me where I never was and where I could not be.
And yet within that very place, my face you often see.
4. I am the beginning of the end; the end of time and space.
I am essential to creation; I surround every place.
5. I have a name, but no face; and I know my own place.
People cry at my sight, and lie by me day and night.
6. My life can be measured in hours. I serve by being devoured.
Thin, I am quick. Fat, I am slow. Your breath is my foe.
7. Never one to start an argument, I always get the last word.
As quickly as I die, I can return to be heard.
8. You wear me each day, but never put me on.
I'll change my color if you leave me out too long.
9. I'm what the poorest have, what the rich require,
What both the tranquil and the despondent desire.
10. I always run, never walk; often murmur, never talk.
I have a bed but never sleep; a mouth but never eat.
11. You use a knife to slice my head,
And weep beside me when I'm dead.
12. At my voice, men may dream or stamp their feet.
When I'm heard, women laugh or sometimes weep.
13. I speak volumes without saying a word,
But I will never stay when your reply is heard.
14. I build up castles, I can keep out the sea.
I make some men blind, I help others to see
15. I'll follow you always, no matter how fast you run,
Fleeing only in darkness, and shrinking in the sun.

Deleted Scene

INTERIOR: "OLD BEN" KENOBI'S DWELLING.

LUKE: Thanks for the light saber, and I'm glad you found that message in the R2 unit. But I can't go with you to Alderaan. I can take you as far as Anchorhead. You can get a transport there to Mos Eisley or wherever you're going.

BEN: You must do what you feel is right, of course.

LUKE: But before I go home to my uncle, I do have one question about this protocol droid. It's given me 23 puzzling messages that I haven't been able to decipher. Do you think you could give me any sort of hint?

BEN: (profoundly) The answer lies deep within.

LUKE: Oh, I see. So I need to look deep inside myself and that's where I will find truth and wisdom?

BEN: No, nothing like that. You simply need to look inside the droid.

LUKE: Huh?

BEN: Protocol droids know hundreds of languages. My guess is that your confusion comes from the Hyper-Text Markup Language module of this one. So take a close look at that and you'll find the hints you're looking for.

LUKE: Look, the sandpeople already disassembled this droid, and I just got finished putting him back together. I've recorded and analyzed everything my handheld scanner will give me, more than once. And I've never seen these hints you're talking about.

BEN: The source will be with you always. Use the source, Luke!

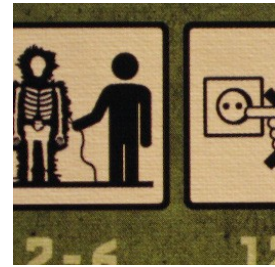

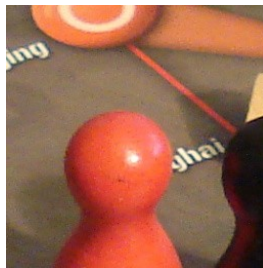

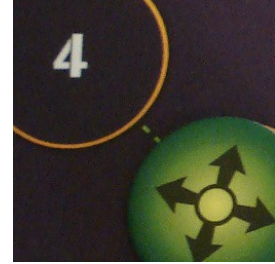

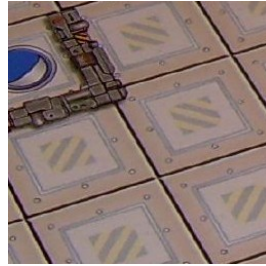

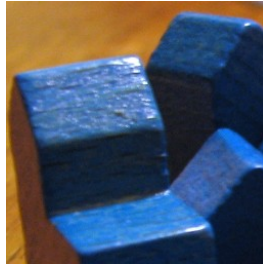

EXTERIOR: SPACE.

An Imperial Stardestroyer heads toward the evil plant-like battle station: the Death Star!

INTERIOR: DEATH STAR - CONFERENCE ROOM.

Olympic Mathematics

A census taker approaches a house and asks the mathematician who answers the door, "How many children do you have, and what are their ages?"

The mathematician says, "I have three children. The product of their ages is 36 and the sum of their ages is equal to the address of the next house up the street."

The census taker walks next door, then returns and says, "I need more information". The mathematician replies, "I have to go, my youngest child is asleep upstairs," and shuts the door.

The census taker writes down the correct ages of the three children.
